1. Introduction
2. The Shido Ecosystem
3. Our Smart Contract
4. Our Values
5. Blockchain Technology
6. DeFi Utilities
7. The Team
8. Final Words

# 1. Introduction

The Shido Ecosystem started to take shape during autumn of 2021. A group of experienced crypto developers and investors were exchanging ideas of what an ideal crypto project should look like. After agreeing on every point, and coming to the conclusion that we shared the same end goal and vision, we started working on what is now known as Shido.

Our mission is to introduce and create a safe entry to crypto for investors. We seek to make our project a safe and easy way to invest while simultaneously bridging the gap between traditional fiat currencies and cryptocurrencies. There has never been an easier way to grow your wealth and earn passive income.

The journey for Shido is just beginning. With the help of our community, we believe we will accomplish and achieve our goals. We want to make sure that every voice is heard, and let the community dictate the path, in which Shido will journey. We have a lot of exciting news and a powerful roadmap to share with you throughout the year. We look forward to this journey with each and every member of our community. You can join the Shido Family through any of our social platforms.

## 2. The Shido Ecosystem

Shido is a unique and powerful Ecosystem with state of the art DeFi Utilities. The Shido Ecosystem is built around the native token \$SHIDO, which are used as the governance token for every use case utility that we are building.

The Shido Ecosystem is also a safe haven for investors with tokenomics that attracts serious investors. Our smart contracts are fully audited, the liquidity pool is safely locked for 100 years. Our CEO and Dev Bjorn Bonnevier is fully doxxed. Our professional team is KYC verified, and we always strive to be as transparent as possible.

Part of our strategic plan included that Shido would first be offered on the Binance Smart Chain (BSC) through a quite Fair Launch. Since then, it has grown organically and established it's foundation. We will now bridge to the Ethereum Network (ETH) through our developed ETH-bridge, which opens up the doors to new investors. This will also pave the way for the entire Ecosystem we are building and Shido Exchange.

Shido will launch a series of utilities and platforms over the coming months. Revenues generated independently from our DeFi Utilities will flow back into our Ecosystem in a series of multiple buy-backs and burns, creating valuable price action for \$SHIDO. Planned utilities that are under development by the team are: Shido Chain, Shido Exchange, Shido Wallet, Shido Card VISA, Shido Perpetuals, Shido NFT Marketplace and Shido Games.

### 3. Our Smart Contract

The Shido Smart Contract will be initially deployed on the Binance Smart Chain (BSC) network. It is a next generation liquidity generating contract with unique tokenomics. It is a native \$SHIDO reflection token that optimizes user profits both now and in the foreseeable future.

Simply hold \$SHIDO tokens in your wallet and automatically receive a proportional share of 4% of every transaction made in \$SHIDO. The dividend is automatically paid out every hour to \$SHIDO holders. There is no minimum amount of tokens required for you to receive the rewards.

Shido Token (\$SHIDO) has a total supply of 100,000,000,000 (100 Billion tokens). The updated circulating supply of the token can be found on our site. We are continuously burning tokens through our planned buy-backs & burn feature integrated into our smart-contract. With every transaction, the circulating supply of \$SHIDO will decrease, ultimately creating a scarce asset. Meanwhile, the balance for each holder will be increasing proportionally.

- 4% reflections from every transaction is redistributed to holders in \$SHIDO. The dividend is automatically paid out every hour.
- 3% of every transaction will transfer into the Dex Liquidity Pool. This will strengthen the floor price and prevent negative volatility for the token. The initial Liquidity will be locked for 5 years.
- 2% of every transaction is transferred into our Smart Contract to be used strategically for Buybacks of \$SHIDO tokens. This is to keep the floor price stable. All tokens that are bought back will immediately be sent to the burner address.
- 1% of all transactions are sent to the Marketing Wallet to be used wisely for promotions. This is to ensure longevity of the project and expand globally at a faster rate.

## 4. Our Values

### **Community**

We have one of the fastest growing communities in cryptocurrency. Our community means everything to us. The Shido Community is the token. We always listen to what our community has to say and we involve our community in all important decisions regarding the Shido Ecosystem. It is easy to get in touch with us. Simply join our Telegram channel and speak to our developers directly. We have several community managers, mods and admins, and a team that interacts with our community on a daily basis.

### **Transparency**

Transparency is a core value for Shido which creates trust. We always strive to be as open as possible about our Ecosystem towards our community and investors. Shido has a professional team with very high ambitions. Our team consists of experienced people that have successfully been active in the crypto space for years. We aim to deliver to you the best project you can imagine. The Dev is fully doxxed and the team is KYC verified. We communicate directly with our community through our channels.

### **Trust**

Trust is very important in cryptocurrency today. Roughly 80% of new projects launched end up being scams and an additional 15% of the new launches fail within their first few months. In an industry where only 5% of the projects survive, it is very important that we can build trust with our community and our investors. Shido is run by professionals that have a proven track-record within cryptocurrency and business. There are no team wallets at Shido. The primary focus of the team is to deliver to our investors. We have also locked our liquidity with a third party secured locker for 5 years which we will annually extend. We communicate with our community directly regarding all major decisions involving the Shido Ecosystem. We do everything we can to make you feel safe and secure investing in our project.

### **Dedication**

Shido is here to stay for a very long time. The year 2022 will be the year of Shido. Launching in March 2022 after months of preparation we have the entire year planned with exciting news and releases. We have a strong and experienced team that has been working day and night for nothing or very

little pay to get us ready. We have a healthy budget for both marketing and development that we will be following strictly throughout the year. We have very high but realistic goals and aim to become one of the world's top cryptocurrencies in 2022.

## 5. Blockchain Technology

The Shido Smart Contract is deployed on the Binance Smart Chain (BSC). The BSC was initially created to enable the use of solidity-based smart contracts at a significantly faster and more efficient rate than other competing blockchains could provide. With decentralized exchanges on the BSC providing fast transactions and very low costs, the BSC has established itself as one of the world's leading blockchains for Decentralized Finance (DeFi). The BSC makes use of BEP-20 token technology, a proprietary blockchain that ensures the security and privacy of all users and developers.

Its inherent dual-chain interoperability enables cross chain communication and scalability of high performance, decentralized applications (dApps) that lead to a quick and fluid user experience. It is also EVM compatible and will support all current Ethereum tools, but with faster and more affordable transactions than the ETH chain. The BSC is based on the Proof of Stake consensus, its on-chain governance allows decentralization and substantial community participation via the use of 21 validators that verify all transactions.

## 6. DeFi Utilities

The year 2022 will be an exciting year for Shido. We have a full suite of state of the art DeFi utilities that we will launch. Several of them are already in the final stages of development and are going through beta testing before launching.

### **Shido ETH-Bridge**

We will in April 2022 launch our very own ETH-bridge and flow into the Ethereum Network (ETH). This will open up the possibility to new investors and broaden our whole Ecosystem. This also paves the way for our other utilities we are building and our Shido Exchange.

### **Shido Exchange**

Shido Exchange, is a next generation decentralized exchange for Web 3.0, iOS and Android. It's a state of the art exchange that will contribute and bring new features to the cryptosphere. Utilizing \$SHIDO, BSC and ETH, it will provide a much faster and easier swapping than current traditional platforms. We will put ourselves in between a professional trading platform and a simpler swap, which will give us many more features that are very popular amongst investors that are using the traditional swaps today.

### **Shido Wallet**

An up to date secure wallet to trade \$SHIDO and other cryptocurrencies. You will see features like multi-change storage for your assets, fiat integration, reflections tracker, contact list and much more. Your assets are safe with Shido Wallet. We are implementing a biometric 2-layer security and authentication as additional layers of security besides your wallet password.

### **Shido Staking Platform dApp**

We are building our very own Shido Staking Platform, a state of the art dApp platform with integrated dashboard for yield farming and staking. You will be able with a click of a button to stake your \$SHIDO tokens and earn rewards daily with a short lockup time.

### **Shido Perpetual Trading & Lending**

Shido Perpetual Platform, is a next generation V2 layer of our decentralized exchange. We are building a DeFi aggregator offering perpetual trading and collateralized loans at frictionless speed and with the lowest fees. Offering cross-margin trading with up to 100x leverage.

## 7. The Team

We are an experienced and professional team with high ambitions. Our team consists of members that have been successful in the cryptocurrency space for many years. We aim to deliver the best project you can imagine and promise to always be fully transparent. Our Dev is fully doxxed and our team is KYC verified. On top of the core team we have several community managers, mods, admins, and ambassadors that interact with our community daily.

Our team is growing. We are always on the lookout for new talent that would like to join our team. If you have a good amount of experience in a relevant field and feel like you can contribute to our project, do not hesitate to contact us.

### SHIDO CORE TEAM

**BJORN BONNEVIER**  
CEO & DEV

**EDIN M**  
CMO & CFO

**BACKO**  
PROJECT MANAGER

**ARDIT**  
COMMUNITY MANAGER

**ERYUSAN**  
ART DIRECTOR & DESIGN

## 8. Final Words

Thank you for taking your time to read V3.0 of the Shido Whitepaper. Please feel free to contact us if you have any questions regarding our project and our vision. We hope this sparked an interest within you and that we soon get the chance to interact with you and welcome you to our family.

Sincerely,

The Shido Team.
